Preface

The Bachelor of Vocation (B.Voc.) programme in Logistics Management is a forward-looking, skills-integrated undergraduate degree developed in alignment with the University Grants Commission (UGC) initiative on skill-based higher education, and structured under the emerging framework of the National Credit Framework (NCrF).

In today's fast-evolving global supply chain landscape, logistics plays a critical role in driving economic efficiency, customer satisfaction, and overall competitiveness. Recognizing this, the B.Voc. in Logistics Management has been designed as a judicious blend of domain-specific skills, professional logistics knowledge, and broad-based general education. It equips learners with both theoretical insights and practical expertise to meet current and emerging industry demands.

This four-year vocational programme aims to bridge the gap between academia and industry by embedding relevant job roles and professional skill development directly into the curriculum. It encourages a comprehensive understanding of logistics functions—spanning supply chain systems, warehousing, and transportation, inventory, and freight management while also nurturing soft skills, leadership qualities, and critical thinking.

Aligned with the Programme Outcomes (POs) specified by the university, the course promotes scientific reasoning, interdisciplinary learning, ethical responsibility, teamwork, and a strong emphasis on lifelong learning. The curriculum also fosters social consciousness, sustainability, and innovation—key attributes for professionals navigating the complex logistics environment.

Graduates of this programme will not only gain technical competencies essential in logistics and supply chain management, but will also demonstrate adaptability, collaboration, and the ability to respond to the dynamic needs of the logistics industry. The B.Voc. in Logistics Management stands as a significant initiative toward creating industry-ready professionals capable of contributing meaningfully to India's economic development and global logistics leadership.

Expert Committee & External Experts

EXPERT COMMITTEE FOR SERVICE EXCELLENCE AND HOSPITALITY (15)

1	Rekha K Nair (Convener)	Associate Professor of Business Administration	NSS College, Rajakumari, Idukki
2	Praveen Thariyan	Associate Professor of Physical Education	St.Dominic's College, Kanjirappally
3	Dr.Bindu M	Associate Professor Of Physical Education & HoD	UC College, Aluva
4	Aneetta Elizabeth Manuel	Assistant Professor (B.Voc.)	Henry Baker College, Melukavu
5	Dinu Dennis	Assistant Professor (B.Voc.)	St.Paul's College, Kalamassery
6	Anish Thanikkal	B.Voc. Nodal Officer	SSV College, Valayanchirangara
7	Ani Ealias	B.Voc. Nodal Officer	Mar Thoma College for Women, Perumbavoor.
8	Devika S	Assistant Professor (B.Voc.)	St.Xaviers College for Women, Aluva
9	Remya P M	B.Voc. Nodal Officer	Alphonsa College, Pala
10	Soumya T K	B.Voc. Nodal Officer	Nirmala College, Muvattupuzha
11	Surya N S	Assistant Professor of Tourism Studies	Sree Narayana Arts & Science College, Kumarakom, Kottayam
12	Binuraj C R	Assistant Professor of Business Administration	SASSNDP Yogam College, Konni
13	Dr.John K Babu	Assistant Professor of Business Administration	BaseliusCollege, Kottayam
14	Shreekanth S K	Assistant Professor of Physical Education	Maharaja's College, Ernakulam
15	Hardin Rixon	B.Voc. Nodal Officer	St.Paul's College, Kalamassery

SYLLABUS WORKSHOP PARTICIPANTS

1. Dr. Sajana K Muhammed
Head of the Department
Dept. of Logistics Management
MES College, Marampally
2. Ms. Neenu Joseph
Asst. Professor
Dept. of Logistics Management
MES College, Marampally
3. Ms. Jishna T Hassan
Asst. Professor
Dept. of Logistics Management
MES College, Marampally
4. Ms. Minu Muhammed
Asst. Professor
Dept. of Logistics Management
MES College, Marampally
5. Dr. Priya Chandran
Asst. Professor
Dept. of Logistics Management
MES College, Marampally
6. Ms. Thansy M Y
Asst. Professor
Dept. of Logistics Management
MES College, Marampally
7. Ms. Soumya T.K
Head of the Department
Dept. of Logistics Management Nirmala
College, Muvattupuzha
8. Ms. Swathychithra K S
Asst. Professor
Dept. of Logistics Management Nirmala
College, Muvattupuzha
9. Mr. Bibin Antony
Asst. Professor
Dept. of Logistics Management Nirmala
College, Muvattupuzha
10. Ms. Athira Sabu
Asst. Professor
Dept. of Logistics Management Nirmala
College, Muvattupuzha
11. Ms. Praveena P Pai
Head of the Department
Dept. of Logistics Management St. Pauls
College, Kalamassery
12. Ms. Celine Jomol V J
Asst. Professor
Dept. of Logistics Management St. Pauls
College, Kalamassery
13. Ms. Amrutha Ouseph
Asst. Professor
Dept. of Logistics Management St. Pauls
College, Kalamassery

Mahatma Gandhi University Kottayam

Faculty/Discipline	Management Sciences / Logistics Management			
Programme	B.Voc. (Honours) Logistics Management			
Course Name	Introduction to Logistics Management			
Type of Course	SDC/Major			
Course Code	MG1SDCLMT100			
Course Level	100			
Course Summary	This course provides a foundational understanding of logistics management and its critical role in the modern supply chain. It introduces students to the evolution, scope, objectives, and elements of logistics. By the end of the course, students will be able to relate theoretical logistics concepts to real- world business operations and appreciate the strategic importance of logistics in enhancing business efficiency and customer satisfaction.

Content for Classroom transaction (Units)

Module	Units	Course description	Hrs	CONo.
1		Logistics Fundamentals and Managerial Functions		
	1.1	Definition, History & Evolution	5	CO1
	1.2	Objectives, Elements and Types of Logistics	5	CO1
	1.3	Definition and its model, Process & activities	7	CO1
	1.4	Role of Logistics management, Relationship between Logistics & Supply Chain Management	5	CO1
2		Logistics Strategy–Planning and Trends		
	2.1	Strategic role of logistics–Definition, Role of logistics managers	5	CO2
	2.2	Strategy options, Lean strategy, Agile Strategies & Other strategies	6	CO2
	2.3	Designing & implementing logistical strategy	6	CO2
	2.4	Trends in logistics	5	CO2
3		Logistics Outsourcing and Customer Service		
	3.1	Logistics Outsourcing–Types, benefits	4	CO3
	3.2	Risk Management in Logistics Outsourcing	4	CO3
	3.3	Customer Service Logistics, Logistics interface with marketing	5	CO3
	3.4	Global Logistics, Reverse Logistics, Green Logistics	5	CO3
4		Practical Application Based on Modules		
	4.1	Case Study: Trace the end-to-end logistics for an e-commerce or retail product	3	CO4
	4.2	Field Visit/Virtual Tour: Submit are port on warehouse/logistics hub	3	CO4
	4.3	Group Project: Prepare a logistics strategy for a local business	3	CO4
	4.4	Green Logistics Survey	4	CO4
5		TEACHER SPECIFIC CONTENT		

Teaching and Learning Approach	Classroom Procedure (Mode of transaction) • Lectures • Case Studies • Q&A Sessions • Assignments • Quizzes • Tests			
Assessment Types	MODE OF ASSESSMENT (Theory and Practical)			
	A. Continuous Comprehensive Assessment (CCA) • CCA for Theory: 25 Marks • Viva voce, Assignment, Written class test CCA for Practical:15 Marks (Practical Assignments, Observation of Practical Skill)			
	B. End Semester Evaluation (ESE) ESE for Theory-50 Marks • Duration of Examination –1.5 hrs • Pattern of examination for Theory –Non-MCQ Different parts of written examination			
	Question Type	Number of questions to answered	Answer word/page limit	Marks
	Part A-MCQ	10 out of 10	Multiple Choice	10*1= 10
	PartB-Short Answers	10 out of 12	Short Answer	10*2 = 20
	Part C- Short Essay	4out of6	Short Essay	4*5 =20
	Total			50 marks
	ESE for Practical : 35 Marks • Mini project report, Field visit Report

Faculty/ Discipline	Management Sciences / Logistics Management				
Programme	B.Voc. (Honours) Logistics Management				
Course Name	Material and Cold Chain Management				
Type of Course	SDC				
Course Code	MG2SDCLMT101				
Course Level	100				
Course Summary	This course provides foundational and applied knowledge in managing materials and cold chain logistics. It covers techniques in inventory classification, stock control, purchasing procedures, codification, and standardization, followed by in- depth study of cold chain logistics, infrastructure, and technologies. The course equips students to manage temperature-sensitive supply chains, enabling quality preservation and operational efficiency in perishable goods distribution.

Syllabus

Mahatma Gandhi University Kottayam

Programme	B.Voc. (Honours) Logistics Management				
Course Name	International Logistics Management				
Type of Course	SDC				
Course Code	MG3SDCLMT201				
Course Level	201				
Course Summary	To develop competencies and knowledge to become professionals in international logistics. To understand logistics functions, multimodal transportation, containerization, and documentation required in global trade. It also enhances awareness of customer-focused marketing in international logistics. To build knowledge of international transport modes, customs procedures, and export-import practices.				
Semester	4	Credits		4	Total Hours
Course Details	Learning Approach	Lecture	Practical	OJT	
		3	1		
Pre- requisites, if any					

COURSE OUTCOMES(CO)

CO No.	Expected Course Outcome	Learning Domains	PO No
1	Understand the basic structure, functions, and evolution of international logistics and trade systems	Understand(U)	PO1, PO2,
2	Analyze global transportation modes and practices, including multimodal transport and freight Systems	Analyze (An)	PO1, PO2,
3	Interpret the role of containerization and port operations in international trade logistics	Evaluate (E)	PO1, PO3,
4	Evaluate documentation, legal processes, and customs procedures in international logistics	Apply (A)	PO2, PO4,

Programme	B.Voc. (Honours) Logistics Management				
Course Name	Air Cargo Logistics Management				
Type of Course	SDC				
Course Code	MG4SDCLMT202				
Course Level	200				
Course Summary	This course offers a comprehensive overview of air cargo operations, covering airport infrastructure, aviation terminology, cargo routing, and documentation. It introduces regulatory frameworks like IATA and ICAO, and provides practical exposure to air freight procedures and marketing strategies. Students also explore current trends such as digital freight platforms, e-commerce logistics, and sustainability in air cargo.				
Semester	4	Credits		4	Total Hours
Course Details	Learning Approach	Lecture	Practical	OJT	75
		3	1	0	
Pre-requisites, if any	Syllabus				

COURSE OUTCOMES (CO)

CO No.	Expected Course Outcome	Learning Domains	PO No
1	Understand the structure and functioning of airports, including regulatory frameworks and future trends in air transport operations.	Understand(U),	PO1
2	Recognize and apply basic air cargo terms, IATA codes, and aircraft configurations used in international logistics.	Understand(U)	PO2,
3	Demonstrate the process of preparing airfreight documents like AWB and S L I , following standard cargo handling practices.	Apply (A)	PO3
4	Analyse aircargo pricing and evaluate marketing and digital strategies relevant to global air logistics.	Analyse (An),	PO6,

	Mahatma Gandhi University Kottayam					
Course Name	Internship					
Type of Course	INT					
Course Code	MG4INTLMT200					
Course Summary	The internship is designed to provide students with real-world exposure and hands-on experience in professional environments aligned with their skill Domain and major area of study. It acts as a vital link between academic learning and industry application, allowing students to apply theoretical Concepts to practical situations. Through active engagement in industry, Research institutions, or academic labs, students gain in sights into organizational operations, workplace practices, and professional expectations. The internship also supports the development of key professional competencies such as communication, teamwork, time management, and ethical responsibility. Additionally, it encourages critical thinking, reflection, and self-assessment, helping students identify personal Strengths and explore potential career path ways. Students shall undergo the Internship in a Firm, Industry or Organization, or engage in Training in Labs With faculty and researchers or other Higher Education or Research Institutions, ensuring alignment with their area of academic specialization.

Programme	B.Voc. (Honours) Logistics Management			
Course Name	Port Management			
Type of Course	SDE			
Course Code	MG5SDELMT300			
Course Level	300			
Course summary	The Port Management course provides an overview of port operations, ownership, and development, focusing on key functions, stakeholder roles, safety, and cargo handling. It highlights Indian port structures, digital management tools, and marketing strategies influenced by global trade. Practical activities complement theory to equip students with skills for effective port management in the logistics sector.

Mahatma Gandhi University Kottayam

Faculty/ Discipline	Logistics Management				
Programme	B.Voc. (Honours) Logistics Management				
Course Name	ENVIRONMENTAL STUDIES				
Type of Course	VAC				
Course Code	MG5VACLMT300				
Course Level	300				
Course Summary	This course provides a basic understanding of the environment, natural resources, ecosystems, biodiversity, and pollution. It emphasizes sustainable development, conservation, pollution control, and the role of individuals and laws in environmental protection.				
Semester	5	Credits		3	Total Hours
Course Details	Learning Approach	Lecture	Practical	OJT	
		3	0	0	
Pre-requisites, if any	Basic knowledge of natural surroundings (school-level environmental science) and Awareness of everyday environmental issues (e.g., pollution, waste)				

COURSE OUTCOMES(CO)

CO No.	Expected Course Outcome	Learning Domains	PO No
1	Students will be able to define and explain the scope, components, and importance of environmental studies and identify different types of natural resources and their conservation strategies.	U	2,3,10
2	Students will be able to describe ecosystem structure, functions, and types, and explain the significance of biodiversity and various conservation methods.	U	2,3,7
3	Students will be able to analyze causes, types, and effects of environmental pollution and suggest appropriate control and waste management strategies.	A	CO-PO 1,2,6,7,10
4	Students will be able to evaluate environmental protection measures, understand related laws and institutions, and appreciate the role of individuals and communities in promoting sustainability.	A	1, 4, 6,7,8,10

Course Name	Project				
Type of Course	PRJ				
Course Code	MG6PRJLMT300				
Course Summary	The project work provides students with an opportunity to identify, analyze, and solve real-world problems relevant to their field of study by integrating and applying the theoretical knowledge and skills acquired throughout their academic program. It fosters independent research, critical thinking, innovation, and the practical use of methodologies, tools, and techniques to design effective solutions. Students are encouraged to work individually or in teams, enhancing their collaboration, time management, ethical responsibility, and self-directed learning. The project also develops competencies in academic writing, documentation, and technical communication. Each project is expected to culminate in a comprehensive report, a working model or prototype (where applicable), and a formal presentation followed by a viva voce examination, demonstrating the student's ability to apply knowledge creatively and professionally in a real-world context.

MGU-B.VOC. (HONOURS)

Syllabus

Mahatma Gandhi University Kottayam

Course Name	Apprenticeship				
Type of Course	APP				
Course Code	MG7APPLMT400				
Summary	As an integral component of the B.Voc. Honours degree programme, students are required to complete a structured apprenticeship or work- integrated learning programme in collaboration with relevant industries, organizations, or institutions. This component, spanning a duration of 280 days, carries 28 academic credits and is compulsory in the student's designated skill domain. It is designed to enhance industry preparedness by reinforcing academic knowledge through sustained, domain-relevant practical experience. The apprenticeship offers students the opportunity to engage directly with real-world professional environments, enabling them to apply domain- specific competencies, gain exposure to industry-standard tools and practices, and participate meaningfully in ongoing operations and projects. This extended, immersive experience serves to bridge the gap between theoretical learning and professional expectations, thereby fostering critical skills for career development and employability. To ensure the effectiveness, academic relevance, and accountability of the apprenticeship: • Each student will be assigned an academic mentor from the parent institution and an industry supervisor from the host organization. Students are required to • maintain a weekly activity logbook, which must be regularly reviewed and signed by the industry supervisor. • Monthly progress reports will be submitted to and reviewed by the academic mentor in consultation with the industry supervisor. • Mid-term and final evaluations will be conducted based on a combination of employer feedback, student outputs/deliverables, and academic performance metrics. • The institution will conduct site visits, virtual check-ins, or regular follow-ups to ensure student engagement, address issues promptly, and uphold the quality of the apprenticeship experience. This structured apprenticeship is a critical step in preparing students for the dynamic demands of the professional world, ensuring that their academic journey culminates in a well-rounded and industry-aligned skill set.				
Semester	7 & 8	Duration	280 days	Credits	28

Course Name	Research Internship
Type of Course	RIN
Course Code	MG7RINLMT400

Summary	As an integral requirement of the B.Voc. Honours with Research degree programme, the Research Internship is designed to provide students with hands-on exposure to real-world research practices in their designated skill domain. This component carries 20 academic credits and extends over a duration of 200 days. The internship must be undertaken in collaboration with a research organization, industry, or university department, under the mentorship of a qualified research guide. The primary aim of this internship is to engage students in industry-linked research projects that allow them to apply theoretical knowledge to practical, domain-specific problems. Students are expected to work on meaningful research inquiries, contribute to data collection and analysis, develop critical thinking and problem-solving skills, and enhance their communication and documentation abilities. In addition to the research internship, students must earn 8 credits through Skill Development Courses (SDCs), specifically chosen for their research orientation, thereby reinforcing their academic and practical foundation. This component not only contributes significantly to the academic rigor of the Honours with Research degree but also ensures a seamless transition from classroom learning to workplace research, preparing students for advanced studies or professional roles in their respective domains.
