Preface

The tourism and hospitality sector is one of the most dynamic and multidisciplinary fields, shaped by its deep connections with culture, environment, society, and commerce. This syllabus has been meticulously crafted to offer students a holistic understanding of this fascinating industry — from its foundational concepts to its practical applications across diverse areas of operation and management.

Through this curriculum, students will explore the basic principles of tourism, its classification and typology, and the richness of India's natural and cultural heritage. They will gain insights into the economic, socio-cultural, and environmental impacts of tourism, understanding its role as both a catalyst for growth and a responsibility for sustainable development.

A strong focus is placed on essential management concepts — planning, organizing, staffing, directing, and controlling — complemented by motivational theories, human behaviour studies, and the role of women's rights and safety in the workplace. The courses also emphasize the operational competencies required in the hospitality sector, including resort management, front office and housekeeping services, and customer-centric approaches such as CRM and personalized guest handling.

Students will learn the core tenets of tourism marketing, destination planning, itinerary preparation, and the role of digital technologies etc. The syllabus also covers the critical role of financial planning, working capital management, capital structure, and investment appraisal techniques, ensuring that learners are well-prepared for managerial roles within the tourism and hospitality industries.

With dedicated courses addressing entrepreneurship, MICE (Meetings, Incentives, Conferences, and Exhibitions), event management, and the aviation and transport sectors, students will gain both theoretical knowledge and hands-on experience vital for successful careers. Environmental stewardship is emphasized throughout, highlighting the interplay between tourism and sustainability, conservation practices, responsible tourism policies, and the role of protected areas and NGOs in preserving heritage and biodiversity.

Through an integrated approach, this syllabus aims to build proficient, socially conscious, and forward-thinking professionals who can contribute effectively to the growth, resilience, and sustainability of the global tourism and hospitality sector.

ON THE JOB TRAINING

Course Name	On-the-Job Training				
Type of Course	SDC				
Course Code	MG1SDCTAH103				
Course Summary	On-the-Job Training (OJT) is designed to equip students with practical skills, workplace discipline, and industry exposure by actively engaging them in real-world professional environments. Conducted in collaboration with firms, industries, research institutions, or higher education establishments, OJT enables students to understand industry standards, apply academic knowledge, and perform job-specific tasks using contemporary tools and practices. The training must be undertaken in the student's own skill domain, aligned with the major area of study in their undergraduate program, to ensure relevance and coherence with their academic and career goals. The program also fosters essential workplace competencies such as communication, responsibility, adaptability, and teamwork. Furthermore, it offers students a platform for career exploration and networking, helping them evaluate potential career paths and align their aspirations with industry demands.

Faculty/ Discipline	Tourism and Hospitality Studies/ Tourism Administration and Hospitality				
Programme	B.Voc.(Honours) Tourism Administration and Hospitality				
Course Name	TRAVEL GEOGRAPHY				
Type of Course	SDC				
Course Code	MG3SDCTAH201				
Course Level	200				
Course Summary	This course provides an overview of geography and its significance in tourism, covering key concepts like the definition, scope, and five themes of geography. It examines physical features such as mountains, plains, and plateaus, along with natural regions and geographical factors like diversity and regional linkages. The course highlights the impact of weather, climate, and seasonality on tourism and destination development. Students will also learn map reading, types of maps, scales, topographical sheets, symbols, and the use of GPS and GIS. It concludes with a brief look at major tourist destinations in Africa, the Middle East, and Europe.				
Semester*	3	Credits		4	Total Hours
Course Details	Learning Approach	Lecture	Practical	OJT	
		3	1	Nil	
					75
Pre-requisites, if any	Students should have a basic understanding of geography, an interest in travel and tourism, familiarity with maps, and basic computer skills. Analytical thinking and a curiosity about different regions and climates will also support effective learning.				

COURSE OUTCOMES (CO)

CO No.	Expected Course Outcome	Learning Domains	PO No
--------	-------------------------	------------------	-------

1	Students will understand the definition, scope, and themes of geography, identify major landforms like mountains, plains, and plateaus, and recognize the natural regions of the world in relation to tourism.	U	2
2	Students will understand how geographical factors, climate, and seasonal variations influence tourism patterns, destination development, and tourist flows.	U	2
3	Students will gain basic map reading skills and understand the use of maps, GPS, and GIS in tourism.	A	3
4	Students will identify key tourist destinations and attractions in Africa, the Middle East, and Europe.	U	2

ON THE JOB TRAINING

Course Name	On-the-Job Training
Type of Course	SDC
Course Code	MG3SDCTAH203
Course Summary	On-the-Job Training (OJT) is designed to equip students with practical skills, workplace discipline, and industry exposure by actively engaging them in real-world professional environments. Conducted in collaboration with firms, industries, research institutions, or higher education establishments, OJT enables students to understand industry standards, apply academic knowledge, and perform job-specific tasks using contemporary tools and practices. The training must be undertaken in the student's own skill domain, aligned with the major area of study in their undergraduate program, to ensure relevance and coherence with their academic and career goals. The program also fosters essential workplace competencies such as communication, responsibility, adaptability, and teamwork. Furthermore, it offers students a

platform for career exploration and networking, helping them evaluate potential career paths and align their aspirations with industry demands.

Faculty/ Discipline	TOURISM AND HOSPITALITY STUDIES/TOURISM ADMINISTRATION AND HOSPITALITY
Programme	B.Voc.(Honours) Tourism Administration and Hospitality
Course Name	EVENT MANAGEMENT
Type of Course	SEC
Course Code	MG4SECTAH200
Course Level	200
Course Summary	This course provides a thorough introduction to Event Management, with a focus on its role in the tourism industry. Students will explore the meaning, scope, and significance of events, including their impact on cultural, religious, business, and promotional tourism. Students will gain practical knowledge of the event planning process—from developing a clear aim and mission to setting objectives and creating a detailed event proposal. Topics will also cover protocols and dress codes, staging and staffing, and the qualities of successful event managers.

Faculty/Discipline	TOURISM AND HOSPITALITY STUDIES/TOURISM ADMINISTRATION AND HOSPITALITY
Programme	B.Voc.(Honours) Tourism Administration and Hospitality
Course Name	Summer Internship
Type of Course	SDC
Course Code	MG4INTTAH200
Course Summary	The internship is designed to provide students with real-world exposure and hands-on experience in professional environments aligned with their skill domain and major area of study. It acts as a vital link between academic learning and industry application, allowing students to apply theoretical concepts to practical situations. Through active engagement in industry, research institutions, or academic labs, students gain insights into organizational operations, workplace practices, and professional expectations. The internship also supports the development of key professional competencies such as communication, teamwork, time management, and ethical responsibility. Additionally, it encourages critical thinking, reflection, and self-assessment, helping students identify personal

strengths and explore potential career pathways. Students shall undergo the internship in a Firm, Industry, or Organization, or engage in Training in Labs with faculty and researchers, or other Higher Education or Research

Institutions, ensuring alignment with their area of academic specialization.

PROJECT

Mahatma Gandhi University Kottayam

Faculty/ Discipline	Tourism and Hospitality studies/Tourism Administration and Hospitality
Programme	B.Voc.(Honours) Tourism Administration and Hospitality
Course Name	Project
Type of Course	SDC
Course Code	MG6PRJTAH300
Course Summary	The project work provides students with an opportunity to identify, analyze, and solve real-world problems relevant to their field of study by integrating and applying the theoretical knowledge and skills acquired throughout their academic program. It fosters independent research, critical thinking, innovation, and the practical use of methodologies, tools, and techniques to design effective solutions. Students are encouraged to work individually or in teams, enhancing their collaboration, time management, ethical competencies in academic writing, documentation, and technical communication. Each project is expected to culminate in a comprehensive report and a viva voce examination, demonstrating the student's ability to apply their knowledge both creatively and professionally. <i>Syllabus</i>

MGU-B.VOC. (HONOURS)

Syllabus

Summary	As an integral component of the B.Voc. Honours degree programme, students are required to complete a structured apprenticeship or work-integrated learning programme in collaboration with relevant industries, organizations, or institutions. This component, spanning a duration of 280 days, carries 28 academic credits and is compulsory in the student's designated skill domain. It is designed to enhance industry preparedness by reinforcing academic knowledge through sustained, domain-relevant practical experience. The apprenticeship offers students the opportunity to engage directly with real-world professional environments, enabling them to apply domain-specific competencies, gain exposure to industry-standard tools and practices, and participate meaningfully in ongoing operations and projects. This extended, immersive experience serves to bridge the gap between theoretical learning and professional expectations, thereby fostering critical skills for career development and employability. To ensure the effectiveness, academic relevance, and accountability of the apprenticeship: • Each student will be assigned an academic mentor from the parent institution and an industry supervisor from the host organization. • Students are required to maintain a weekly activity logbook, which must be regularly reviewed and signed by the industry supervisor. • Monthly progress reports will be submitted to and reviewed by the academic mentor in consultation with the industry supervisor.
	• Mid-term and final evaluations will be conducted based on a combination of employer feedback, student outputs/deliverables, and academic performance metrics. • The institution will conduct site visits, virtual check-ins, or regular follow-ups to ensure student engagement, address issues promptly, and uphold the quality of the apprenticeship experience. This structured apprenticeship is a critical step in preparing students for the dynamic demands of the professional world, ensuring
	that their academic journey culminates in a well-rounded and industry-aligned skill set.

COURSE OUTCOMES (CO)

CO No:	Expected Course Outcome	Learning Domains	PO No:
Upon the successful completion of the course, the student will be able to:			
1	Gain hands-on professional experience by engaging in long-term, domain-specific apprenticeship in real-world industry environments.	S	1,3,6,10
2	Apply domain-specific theoretical knowledge to solve real-time problems, enhancing technical and problem-solving competencies.	A	1,2,3,10
3	Demonstrate professional competencies such as workplace etiquette, communication skills, and teamwork in a collaborative work culture.	S	4,5,8,9
4	Build a professional portfolio by achieving practical outcomes and establishing credible industry references and credentials.	C	5,9,10
5	Cultivate reflective thinking, adaptability, and a lifelong learning mindset through structured and mentored work experience.	Ap	1,6,8,10
6	Transition smoothly from academic study to professional practice by developing job-specific skills and industry-aligned competencies.	S	2,3,5,10
*Remember (K), Understand (U), Apply (A), Analyse (An), Evaluate (E), Create (C), Skill (S), Interest (I) and Appreciation (Ap)

MGU-B.VOC. (HONOURS)

Syllabus

Summary	As an integral requirement of the B.Voc. Honours with Research degree programme, the Research Internship is designed to provide students with hands-on exposure to real- world research practices in their designated skill domain. This component carries 20 academic credits and extends over a duration of 200 days. The internship must be undertaken in collaboration with a research organization, industry, or university department, under the mentorship of a qualified research guide. The primary aim of this internship is to engage students in industry-linked research projects that allow them to apply theoretical knowledge to practical, domain-specific problems. Students are expected to work on meaningful research inquiries, contribute to data collection and analysis, develop critical thinking and problem-solving skills, and enhance their communication and documentation abilities. In addition to the research internship, students must earn 8 credits through Skill Development Courses (SDCs), specifically chosen for their research orientation, thereby reinforcing their academic and practical foundation. This component not only contributes significantly to the academic rigor of the Honours with Research degree but also ensures a seamless transition from classroom learning to workplace research, preparing students for advanced studies or professional roles in their respective domains.
