# PREFACE

The **Minor Programme in Fashion and Apparel Design** has been thoughtfully designed to welcome students from diverse academic backgrounds into the vibrant and continuously transforming world of fashion. It lays a strong foundation in the fundamental principles, essential techniques, and modern practices that define the global fashion and apparel industry.

With a balanced focus on creativity, hands-on skill development, and market relevance, the curriculum spans six essential subjects: Personal Styling, Fundamentals of Textiles, Sewing Techniques, Thematic Garment Development, Fashion Styling, and Brand Management. These subjects provide students with a holistic view of both the artistic and business dimensions of fashion.

The programme commences with core modules that lay the groundwork for a strong fashion foundation:

- **Textile Surface Design:** Introduces techniques like dyeing, printing, and embroidery to creatively enhance fabric surfaces.
- **Fibre to Fabric:** Covers the transformation of raw fibres into fabrics, focusing on properties, processing, and classifications.
- **Basic Garment Construction:** Develops fundamental skills to construct garments from patterns using essential tools and techniques.
- **Fashion Accessories:** Explores the design and creation of accessories, emphasizing materials, aesthetics, and cultural relevance.
- **Fashion Marketing:** Examines how fashion products are marketed through strategies like branding, consumer behavior, and promotion.
- **Luxury Fashion:** Explores the evolution, branding, and consumer psychology of luxury fashion, with focus on innovation and sustainability.

This minor programme empowers students with a well-rounded and interdisciplinary understanding of fashion—bridging art, craft, and commerce. Whether pursued for personal growth or professional advancement, it opens new creative pathways and prepares learners to engage with fashion as both a cultural expression and a career opportunity.

| <b>Course<br/>Summary</b>        | This course introduces students to the foundational techniques in textile ornamentation, focusing on skill-based learning in hand stitching, dyeing, and printing methods. It encourages creativity through hands-on experimentation with natural materials and traditional processes, fostering both technical proficiency and artistic exploration. |                |                  |            |                    |

| Course<br>Summary        | This course offers a foundational understanding of textiles and fashion, exploring various fibre types, yarns, fabric construction techniques, and textile finishes. It also familiarizes students with essential fashion terminology and principles of colour theory. Designed to establish a solid base, the course equips learners for advanced studies or careers in fashion, design, and the textile industry. |         |           |     |             |
